

Chinnawat Sirima

Senior Unity Game Developer | Multiplayer, AI & Gameplay Systems

+66895596463 | chinnawat13577@gmail.com | <https://chin13577.github.io/>

Summary

Senior Unity Game Developer with 8+ years of experience developing mobile, PC, HTML5, multiplayer, and VR games. Strong in multiplayer gameplay programming, AI behavior systems, and gameplay architecture using Unity, Photon Quantum ECS, Photon Fusion, Mirror Networking, Behavior Trees, and FSM. Experienced in leading developers, conducting code reviews, managing full game development cycles, and publishing games to Play Store, and App Store. Skilled in Cocos Creator, C#, JavaScript, TypeScript, Node.js, OOP, and SOLID principles.

Experience

(Apr 2024 - Present) **Senior Game Developer at NANUQ Co., Ltd.**

Dicemon Tactic (Unity · Mobile)

- Implemented core gameplay loop, minigame framework, and skill system using Mirror Networking.
- Implemented asset bundle management and UI navigation flow for out-game systems including Main Menu, Shop, In-App Purchases, Ads, Leaderboard, and Community Hall.

Bounty Brawl (Unity · PC / Steam · Shipped)

- Implemented enemy AI attack behavior and enemy perks using FSM.
- Fixed networking bugs in this action multiplayer game built with Photon Fusion.

League of Bomb (Unity · Mobile)

- Implemented Player AI (Bot) for multiplayer using Behavior Tree and Photon Quantum (ECS).

Prototype Horror Game (Unity · Mobile · Prototype)

- Prototyped a multiplayer horror game using Photon Quantum (ECS).
- Implemented bot behavior using Behavior Tree.

(Jun 2023 - Mar 2024) **Lead Game Developer at GIANT WHALE STUDIO Co., Ltd.**

Evil Soul (Unity · Mobile · Shipped)

- Managed and developed the game throughout its entire life cycle.
- Implemented core gameplay systems including the combat system, skill system, shop mechanics, and player data structures.
- Integrated with PlayFab as persistence backend and custom backend server.
- Developed character skill creator tools for designers using XNode.
- Utilized Unity Addressables for efficient asset management in projects.
- Managed and published both Closed Beta and Open Beta versions on the Play Store and App Store.

(Jul 2020 - Jan 2023) Senior Game Developer at EXP GAMING Co., Ltd.

(Promoted to Lead Game Developer, Oct 2022)

- Led frontend game developers, conducting code reviews.
- Developed HTML5 Games and Multiplayer games using Socket.IO, Cocos Creator.
- Managed and developed a simulated gambling game "Super Casino Club".

(Apr 2020 - Jun 2020) Game Developer at MOTIONX STUDIO Co., Ltd.

Dash Dash World (Unreal Engine · Oculus, VR)

- Implemented Motion Tracker for creating player bot animation.
- Implemented Tutorial System and Emote System.
- Implemented mascot AI behavior.

(Jun 2018 - Mar 2020) Game Developer at ZERO-bit Co., Ltd.

(Promoted to Deputy Senior Game Developer, Jan 2020)

Athenion: Tactical CCG (Unity · Mobile · Shipped)

- Designed and implemented code structure of gameplay system architecture.
- Built tools for creating card abilities
- Implemented Tutorial System and Story mode.

(Jun 2017 - May 2018) Unity Programmer at Any.imedia Co., Ltd.

- Developed and created interactive media for museums and events using Unity3D
- Used technologies such as Kinect V.2, Leap Motion, HTC Vive, and others.
- Gathered customer requirements for design and software development.

(May 2016 - Jul 2016) Game Developer Intern at KiriMaru Co., Ltd.

- Created mini-games using Unity3D.
- Collaborated with an intern game designer.
- Tracked bugs in company products.

Education

(Jun 2013 - May 2017) Bachelor's Degree in Computer Engineering

Chiang Mai University, Thailand

GPA 2.88

Technical Skills

- Game Engines: Unity, Cocos Creator, Unreal Engine
- Multiplayer / Networking: Photon Quantum, Photon Fusion, Mirror Networking, Socket.IO
- Programming: C#, JavaScript, TypeScript, Node.js
- AI / Architecture: Behavior Tree, FSM, ECS, OOP, SOLID
- Tools / Backend: PlayFab, Unity Addressables, XNode, Git, Plastic SCM, Figma
